FINTECH SOFTWARE DEVELOPMENT SERVICES

Staff augmentation or project-based software development teams to meet your unique business growth needs

When your in-house teams are overburdened, strategic priorities suffer. Whether you have a backlog of software development tasks or API development projects piling up, Core10's reliable, talented pool of experts can help.

Project-based custom software development

Our team takes the project off your hands and is solely dedicated to it for a fixed duration.

Development staff augmentation

Our team integrates within yours to support projects of any size or scale.

What can we do together?

Do you need to revitalize outdated software? Eliminate your backlog? Open new revenue opportunities? Whatever your business need, our fintech experts can help.

✓ Cloud development
✓ Software product development
✓ Legacy software modernization

✓ Application development
✓ API integration development

The Core10 difference

Banking and lending specialists

We work exclusively for community banks, credit unions, fintechs, and financial services platforms, so we get your pain (and know your tech inside and out).

Low-cost, North American-based talent

We hire the best people from the Hereshore® so your team works on your schedule.

Flexible and scalable solutions

We make the right people with the right skill sets available as you need them, so you can move as the market demands.

Stellar industry reputation

Our strong work ethic and impressive results have earned us a great reputation with major players in the business.

craft bank

" Core10 is doing groundbreaking work in the lending space with community bank needs front of mind. We are excited to partner with them to solve customer needs quickly and cost-effectively."

**ROSS MYNATT
CEO OF CRAFT BANK**

How we help

We're a seamless extension of your team.

We only work in fintech, so we understand what you're up against. Your success is our success. We want to make sure your software works like it's supposed to, is delivered on time, and within budget.

The help you need, when you need it.

If your team is stretched and you don't have time to search for the right people, you need talented, trained developers to step up. We'll get you where you want to be, and our transparent process gives you confidence along the way.

Fluent in core banking platforms.

We have experience in the core banking platforms you need to work in, and understand exactly what it takes to upgrade legacy systems so you can roll out the modern services your customers want.

Success starts here.

Our developers follow our proprietary, hybrid Agile-based process called the Core10 Way™. But before developers engage, we:

1

Listen
Tell us about your project — what are your business goals?
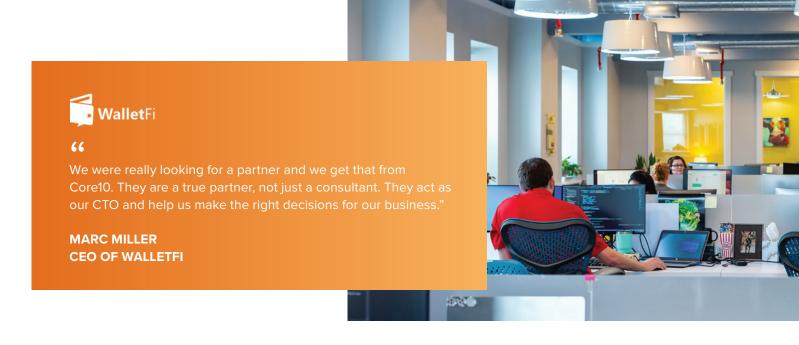

2

Find the right fit
We pair your business needs with the top development talent in the U.S.

3

Watch the magic
Your new team combines fintech development expertise with exceptional project management skills to deliver the goods.

WalletFi

"
We were really looking for a partner and we get that from Core10. They are a true partner, not just a consultant. They act as our CTO and help us make the right decisions for our business."

MARC MILLER
CEO OF WALLETFI
